The goal of the new development was to have a machine not only for efficiently and reliably gluing a series of formed parts but also for processing smaller quantities of straight parts. The NKD 720 has a gluing system, which applies the glue directly on to the edgebanding material. The coilcut off device is either activated by foot pedal or, for serial production, by preselecting the edge length via a digital length counter optional. The panel is placed on height spacers, which are fixed on the working table, according to the shape of the panel. No template is required. Because of the flexibility of the NKD 720, shaped parts and straight parts can be processed easily on this machine. Breast augmentation includes primary breast augmentation to increase breast size, as well as revision surgery to correct or improve the result of a primary breast augmentation surgery. Breast reconstruction includes primary reconstruction to replace breast tissue that has been removed due to cancer or trauma or that has failed to develop properly due to a severe breast abnormality. Breast reconstruction also includes revision surgery to correct or improve the result of a primary breast reconstruction surgery. If you later choose to have your implants removed and not replaced, you may experience unacceptable dimpling, puckering, wrinkling, or other cosmetic changes of the breast, which may be permanent. You should have an MRI 3 years after your surgery and then every 2 years after that for as long as you have your breast implants to determine if rupture is present. If implant rupture is noted on an MRI, you should have the implant removed, with or without replacement. Ask your doctor to help you distinguish the implant from your breast tissue.

Symptoms of a ruptured implant may be hard knots or lumps surrounding the implant or in the armpit, change or loss of size or shape of the breast or implant, pain, tingling, swelling, numbness, burning, or hardening. Tell your doctor of these symptoms and remove ruptured implants. Please discuss any history of mental health disorders with your surgeon prior to surgery. Patients with a diagnosis of depression or other mental health disorders should wait for resolution or stabilization of these conditions prior to undergoing breast implantation surgery. Talk to your doctor about other complications. This device should be used by your physician with extreme caution if you have a chronic medical condition such as diabetes, heart, lung, or circulatory system disease, or obesity. Use of this device is limited to those physicians who have the appropriate level of medical education and surgical experience in the appropriate surgical procedures. Results of the procedure will vary depending upon your age, surgical site, and experience of the physician. Results of the procedure may or may not be permanent. It does not describe all the potential risks associated with fat grafting procedures. Rare serious side effects may also occur and include severe skin irritation and allergic reactions.
