Reload to refresh your session. Production and News studios at large broadcasting stations will find in D 816 an excellent solution. All faders are VCA controlled. It includes 3 telephone Hybrids; two for land lines and one for cellular phone. All three are able to work in conference, included the cellular phone. This way you can make two tasks at the same time. Four electronic VUMeters of comfortable reading indicate the levels of both outputs. The visual indicator informs that the computer has recognized the console. If it indicates C4 there are 4 digital channels. Showing C8 it indicates 8 channels 2 stereo in PLAY and 2 stereo in REC. It has a VUMeter that indicates the microphone compression level, which allows you to have the same sound level for all speakers voices.

Then, the console can manage up to 6 microphones controlled from 3 faders. Internal audio compressors allows the console to have the same audio level in all Mics. Electronic components of advanced technology allow us to assemble the thinner profile console at the market about 15 mm. This feature avoids the need of cutting the operation desk for a comfortable operators position. This allows transmitting radio programs from the journalists house, using the links that Solidyne offers Audicom Multicast with Internet link From the automation software on the PC we recommend Audicom, the digital audio signal goes to the D816. It is mixed with microphones and telephone lines. Then it is processed with the Audimax 362 and finally returns, using digital format, to the PC to generate the Internet audio streaming. There is no need for audio card on your PC. This prevents noise and distortion! XLR connectors for mics; RCA for unbalanced lines and DIN5 for stereo balanced lines. Tally light 12V output. Connector to start external devices. 2 USB connections for one or two PCs.
